

PATIENT NAME : MRS. GAURI

I.P. No. : 51741

UHID : 131752

D. O. A. : 25th NOVEMBER 2018

TREATING DOCTOR : DR. RAVI GUPTA

FEEDBACK :

Thanks to the effective communication and confidence of Dr. Ravi Gupta and his team for the wonderful treatment & care showed to me following my laparoscopic surgery of my right kidney.

There was a tubercular infection in my right kidney. I got complete treatment of tuberculosis but in recent medical test/report my right kidney was found non-functional and to save my left kidney from any infection, it was required to remove my right kidney.

Before I came into EHCC Hospital, I was very nervous and daunted by the fear of the unknown.

I'd like to particularly thank Dr. Ravi Gupta & his surgical team for the successful completion of such laparoscopic surgery.

However, I'd also like to thank all nursing staff, who all played such important part in my treatment and recovery.

Thank you all once again for all your care & support.

Best regards
(Gauri Meena) Gauri
